EDUCATION

University of Waterloo

Bachelor of Computer Science, Honours, Co-operative Program

Waterloo, ON

Sep. 2025 – Apr. 2030

PROJECTS

Mappin' | *TypeScript, Chrome Extension MV3*

Apr. 2026

- Designed a location-arrival alarm as both a Chrome Extension (MV3) for desktop Google Maps and a PWA for mobile.
- Extracted destination coordinates from Google Maps links across multiple URL formats, with a fallback for desktop browsers to cover all common share types.
- Built arrival detection using Haversine distance to check how close the user is, with an adjustable radius from 50m to 2000m that triggers sound, vibration, and browser notifications.

UCEY – Urban Planning Interface | *TypeScript, React, Web APIs*

Mar. 2026

- Built a web app that helps urban planners find underused city land like brownfields and estimate the redevelopment cost using TypeScript and React.
- Led the front end, connecting map APIs to an interactive interface so users can browse and assess sites directly on a map instead of manually looking through raw data.

YSafe – Navigation App | *Dart, Google Maps API*

Feb. 2026

- Developed a navigation web app and AI assistant using Dart and Google API keys to show pedestrians safer and faster routes.
- Optimized route-generation by extracting 5 years of York Region Open Data to train the app to recommend routes based on historically occurred safety incidents.

EXPERIENCE

Waterloo Aerial Robotics Group

Nov. 2025 – Present

Autonomy Member

Waterloo, ON

- Improving autonomous task performance by processing and labeling flight tests and object detection datasets to train the drone.

Waterloo Rocketry

Nov. 2025 – Present

Software Member

Waterloo, ON

- Developed internal software in Python and Java to support data collection workflows, ensuring software stability during rocket launch operations.

London Drugs

Oct. 2024 – Aug. 2025

Tech Specialist

British Columbia, Canada

- Faced with varied and complex customer device issues, provided expert technical assistance and digital photography troubleshooting, resolved malfunctions, and suggested practical solutions on the spot.
- Recommended add-on products based on each customer's needs, leading to additional purchases in 41% of transactions.

Sardis Kiwanis Club

Sep. 2021 – Jun. 2025

Web Master

Chilliwack, BC

- Managed the club's digital campaign, thus improving online platforms with a 23% increase in member participation.
- Chaired the Promotions Committee for charities, planned and executed digital campaigns in the local community, raising \$15,000+ in donations to cancer research across consecutive years

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript, TypeScript, Dart, HTML/CSS, SQL

Frameworks: React, Node.js, Flutter

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Bash, Linux
